

Markdown LaTeX Math to PDF

KaTeX renders display and inline math before Chromium prints the page.

Display math (latex fence)

$$\frac{\partial L}{\partial w} = \sum_{i=1}^n (y_i - \hat{y}_i) x_i$$

Inline and \$\$ delimiters

Inline: the mass–energy relation is $E = mc^2$.

Display:

$$\int_0^1 x^2, dx = \frac{1}{3}$$

Also supported: `\(...\)` and `\[...\]` delimiters in prose.
